

1U DC Power Distribution Unit for IoT Cabinets

Overview

Specially designed for high-density telecom cabinets and edge computing, our compact smart DC power distribution unit provides comprehensive "monitoring and control" across 10 individual output channels in a slim 1U form factor. Smart PDU I-Type is a compact 1U DC distribution with intelligent plug-in breakers suitable for applications where individual power and energy monitoring is required for each breaker output. The intelligent breakers also support programmable and remote control functions through RS485 communication. Delta, a global leader in power management and a provider of IoT-based smart green solutions, today announced the launch of its new SMART PDU I-Type power management unit. This innovative 1U DC distribution unit delivers unparalleled flexibility and control for telecom network operators, tower. Feature highlights: The 1U Smart DCDU Rack-Mounted DC Power Distribution Unit is an intelligent switch device designed for telecom base stations, featuring advanced power metering chips and power management technology. It supports RS485, NB-IoT, and 4G communication for data exchange, with.
