

A comprehensive price list for fire-resistant metal cable trays

Overview

Fire Resistant Cable Tray for Sale - 2026 Find top-rated fire resistant cable trays for sale with customizable options. Compare prices, MOQs, and supplier.

Key Takeaways

Fire-resistant metal cable trays typically range from \$50 to \$250 per meter, depending on material, fire rating, and load capacity. Price Range and Factors

The cost of fire-resistant cable trays varies widely based on several factors:

- **Material:** Galvanized steel, stainless steel, aluminum, and fire-resistant fiberglass are common options. Steel trays are generally more affordable, while stainless steel and specialized coatings increase the price .
- **Fire Rating:** Trays with higher fire resistance (e.g., 60, 90, or 120 minutes at temperatures up to 1050°C) command higher prices due to enhanced safety features and compliance with standards like ISO 834-1, EN 1363-1, and DIN 4102-12 .
- **Load Capacity and Size:** Wider trays or those designed to carry heavier loads (e.g., 10 kg/m over 1.65 m spans) cost more due to reinforced construction .
- **Length and Customization:** Standard lengths are often 3 meters, but custom sizes or specialized finishes (powder coating, intumescent layers) can increase costs .

- **Supplier and Certification:** Prices vary by manufacturer and region. Suppliers with verified fire testing, ISO certification, and long-term reliability may charge a premium.

Typical Applications

Fire-resistant cable trays are used in hospitals, data centers, power plants, high-rise buildings, and industrial facilities where maintaining electrical and communication systems during a fire is critical. Choosing a tray that meets both mechanical and fire safety requirements ensures compliance and reduces potential repair costs after fire incidents.

Purchasing Tips

- Verify fire rating certificates and compliance with local codes.
- Consider low smoke, halogen-free (LSZH) options for enclosed public spaces.
- Compare supplier reliability, warranty, and installation support.
- Evaluate total cost of ownership, including installation, maintenance, and potential replacement. In summary, while prices generally range from \$50 to \$250 per meter, the final cost depends on material, fire rating, load capacity, and supplier quality. For precise pricing, contacting suppliers like NewReach, Cablofil, or HERMI Solutions with your project specifications is recommended.
