

Agent for 2-core fiber optic distribution boxes

Overview

FBR-11604 Fiber-Optic Distribution Box, 2-Core FBR-11604 Fiber-Optic Distribution Box, 2-Core is a high quality product by Bud Industries used for electron.

Key Takeaways

Several manufacturers and suppliers offer 2-core fiber optic distribution boxes suitable for indoor and outdoor FTTx/FTTH deployments, including Bud Industries, OTRANS, ME Fiber Optic, and Fibconet.

- Bud Industries (FBR-11604): Offers a high-quality 2-core fiber optic distribution box designed for electronic enclosure applications, suitable for secure fiber management in compact setups .
- OTRANS: Provides a wide range of fiber distribution boxes (1-24 cores) for indoor and outdoor use. Their 2-core models are durable, IP65 rated, and designed for FTTx networks, supporting wall, pole, or cabinet mounting .
- ME Fiber Optic (FDB-102A-1): This 2-core outdoor distribution box features IP-55 protection, SC connectors, and a PLC splitter. It ensures safe fiber splicing, efficient cable fixing, and protection against dust and water, making it ideal for telecom, broadband, and CATV networks .

- **Fibconet (2-Core Cassette Type SC Adaptor Box):** Integrates fiber splicing, splitting, distribution, and storage in one unit. Made from durable ABS material, it is waterproof, dust-proof, and suitable for wall or pole mounting. The cassette-type SC adaptor allows organized cabling and easy maintenance .

Features to Consider

- **Protection Rating:** IP55–IP65 for outdoor durability against dust and water.
- **Connector Type:** SC connectors are common for 2-core boxes; some include PLC splitters.
- **Installation Flexibility:** Wall-mounted, pole-mounted, or cabinet-mounted options.
- **Material:** High-impact ABS or ABS+PC for mechanical protection and longevity.
- **Integration:** Some boxes combine splicing, distribution, storage, and cable management in a single enclosure.

Applications

2-core fiber optic distribution boxes are widely used in FTTx/FTTH networks, including residential, commercial, and outdoor deployments. They serve as termination points for feeder and drop cables, provide secure fiber splicing, and facilitate organized network expansion . For procurement, contacting these suppliers directly through their websites or authorized distributors will provide product availability, pricing, and technical support tailored to your deployment needs.
