

Burundi hot-dip galvanized cable tray price

Overview

Nicaragua hot-dip galvanized cable tray price quote Find the best hot dip galvanized cable tray price list for 2025.

Key Takeaways

Hot-dip galvanized cable trays in Burundi typically range from \$50 to \$200 per tray, depending on type, size, and thickness. Price Overview

Hot-dip galvanized cable trays, especially ladder-type trays, are widely used in industrial, commercial, and construction projects in Burundi due to their corrosion resistance and durability . Prices generally depend on the tray type, material thickness, and dimensions:

- Ladder trays: \$50–\$200 per standard 2.4-meter tray
- Perforated trays: \$40–\$150 per tray, slightly cheaper due to thinner metal and lighter load capacity
- Wire mesh trays: \$30–\$100 per tray, suitable for lighter cables and flexible installations

Factors Affecting Price

- Material and Thickness: Thicker steel or premium galvanization increases cost.
- Tray Type: Ladder trays are more robust and expensive, while perforated or wire mesh trays are lighter and cheaper.

- **Size and Length:** Standard trays are 2.4 meters; custom lengths or widths may increase the price.

- **Supplier and Shipping:** Local suppliers in Burundi, such as Brilltech Engineers, offer direct supply and export services, which may affect final pricing .

Local Suppliers in Burundi

- **Brilltech Engineers Pvt. Ltd.:** Offers hot-dip galvanized cable trays with robust construction suitable for harsh climates and industrial use. They provide ladder, perforated, and modular raceway systems .

- **Other suppliers:** Contacting local distributors or requesting quotes from manufacturers can provide more precise pricing based on quantity, specifications, and delivery options .

Recommendations

- Request quotes from multiple suppliers to compare prices and shipping costs.

- Specify tray type, length, and thickness to get accurate pricing.

- Consider bulk orders for potential discounts, especially for large construction or industrial projects. By considering these factors, you can estimate that a hot-dip galvanized ladder tray in Burundi will likely cost between \$50 and \$200 per unit, with perforated or wire mesh trays being slightly less expensive .
