

Cold Aisle Cabinet Cold Aisle Low Temperature Resistance Manufacturers

Overview

An aisle containment system is a simple way to improve cooling efficiency in hot aisle/cold aisle rack configurations.

Key Takeaways

Leading manufacturers of cold aisle containment systems include Lepin Network, EDP Europe, Legrand, Cool Shield, and Tate, all offering modular, customizable solutions designed to maintain low temperatures and improve data center cooling efficiency. Key Manufacturers and Offerings

1. Lepin Network Lepin Network provides modular row-based cold aisle containment systems that separate cold and hot air streams, improving cooling efficiency and reducing operating costs by 20-50% if properly installed. Their systems feature dual mechanical or sliding doors, modular panels, and scalable designs suitable for future expansion . 2. EDP Europe EDP Europe designs and installs bespoke aisle containment systems for new builds, retrofits, and hyperscale projects. Their solutions include both cold aisle and hot aisle containment, with custom infill panels to accommodate obstacles or varying rack heights. They offer scalable, modular systems that can be floor-standing or ceiling-suspended, with global support from engineering and installation teams . 3. Legrand Legrand's cold aisle containment systems create enclosed corridors in front of server cabinets, ensuring cold air is delivered directly to equipment intakes. Their modular Contain-IT FLEX system allows flexible configurations, pre-fabricated components for faster on-site assembly, and improved airflow management to reduce energy consumption and extend equipment lifespan . 4. Cool Shield (WAVE) Cool Shield, under Worthington Armstrong Venture (WAVE), provides state-of-the-art hot and cold aisle containment solutions. Their systems optimize energy use, maintain consistent supply temperatures, and are suitable for both new and existing data centers. They offer turnkey, customizable solutions with modular designs for easy adaptation to facility layouts . 5. Tate Tate's Cold Aisle Containment (CAC) systems capture cold air from CRAH or CRAC units and enclose it within the aisle to prevent mixing with hot exhaust air. Built from robust aluminum frames and polycarbonate panels, Tate's systems are fully customizable in length, width, and height, with options for sliding or hinged doors, roof panels, and gasketed seals to optimize containment performance .

Considerations for Low Temperature Resistance

When selecting a manufacturer, consider:

- **Material durability:** Aluminum frames and polycarbonate panels are common for low-temperature resilience.
- **Modularity and scalability:** Systems should allow future expansion or reconfiguration.
- **Airflow management:** Proper sealing and containment prevent hot/cold air mixing, maintaining consistent low temperatures.
- **Customization:** Bespoke solutions ensure compatibility with existing racks, raised floors, and ceiling layouts. These manufacturers provide solutions that not only maintain low temperatures but also enhance energy efficiency, reduce hotspots, and improve overall reliability of data center operations.

Article Content

Cold Aisle Containment | Legrand

By maintaining consistent, predictable temperatures, cold aisle containment minimizes thermal stress and reduces the risk of

Custom Data Center Containment Solutions

AIRSEAL is 100% focused on designing, manufacturing, and installing the highest quality, best value containment systems for Data

Air Containment Solutions for Data Center Airflow | Chatsworth

Optimize data center cooling with CPI air containment solutions, including cold aisle containment and ceiling options that boost

Contained cold aisle | CONTEG

CONTEG's aisle containment solution leverages a modular system that separates cold air from hot exhaust air to create an enclosed

Stulz: Your Global Cooling Expert.

Over 50 years as a leading pioneer in cooling solutions for reliable applications and data centers. Energy

Accelelevation | Custom data center containment systems

Vertically integrated manufacturer of hot aisle containment, cold aisle containment, white space structure

Cold Aisle Containment in Data Centers | Subzero

Cold aisle containment systems use doors at aisle ends, ceiling panels or lids above racks, and structural

Aisle Containment | Vertiv Hot/Cold Aisle Containment Solutions

Find out how to improve your data center infrastructure efficiency, using the cold aisle containment or hot aisle containment solutions

Hot and Cold Aisle Containment Solution | Legrand

Effective aisle containment is critical to maintaining peak data center cooling efficiency. By creating a physical barrier between cold

Hot & Cold Aisle Containment Systems For Data Centers by Cool Shield

Aisle containment is an airflow management system that completely separates the cold supply airflow from the hot equipment

Data Center Aisle Containment Systems | Profile IT

Explore 30 hot aisle, cold aisle, structural, door, roof, flexible containment and airflow-control products for

Hot Aisle Containment vs. Cold Aisle Containment:

In cold aisle containment, the overall data center becomes the hot aisle and that space

Aisle Containment | Modular Cleanroom & Data Center Containment ...

What is Aisle Containment? Aisle containment is a critical airflow management strategy that separates cold supply air

Cold Containment | Legrand Data Center Solutions

Data centers opting for cold containment deliver cold air through a raised floor into the aisle. This air is contained in front of the

Data Center Aisle Containment

Open vs Cold vs Hot aisle containment Let's see this in practice based on a typical 500kW facility: In an open aisle configuration,

CONTAINMENT SYSTEM

Cold Aisle drop away ceiling panels (clear or opaque) Class A rated, CA State Fire Marshal, UL & FM Global listed and approved Hot
