

Fiber Optic Cable Tube-Type Waterproof Splicing Package

Overview

Fiber Optic Splice Closure — Dome & Inline | TTI FiberDome and inline splice closures for aerial, duct, and direct burial — 12 to 288 cores, IP68 waterproof.

Key Takeaways

A fiber optic tube-type waterproof splicing package is a protective enclosure designed to secure and manage fiber splices in harsh environments, offering IP68 waterproofing, mechanical or heat-shrink sealing, and support for multiple fiber cores.

Overview

A fiber optic splice closure (also called a joint closure or splice enclosure) is used to protect fiber optic splices at cable junction points from environmental hazards such as moisture, dust, temperature extremes, and mechanical stress, ensuring long-term network reliability. These enclosures are suitable for aerial, underground, duct, wall-mounted, or pole-mounted installations. They are designed to accommodate both round and flat cables and support various connector types like SC, LC, or PLC splitters.

Types and Features

- **Dome-Type Closures:** Feature a vertical top-entry design with a heat-shrink seal creating a permanent 360° waterproof barrier. They are typically re-enterable and support 12 to 288 fiber cores. Dome closures are ideal for aerial, pole-mount, and underground applications .
- **Horizontal/Inline Closures:** Use a mechanical clamp seal for re-enterable access and are suitable for wall-mounting or horizontal installations. They often include multiple ports for branching uncut cables and can accommodate module-type PLC splitters .
- **Material and Durability:** Made from high-strength, anti-corrosion engineering plastics or robust polymer materials. They are IP68 rated, meaning they can be submerged in water up to 1.5 meters for 24 hours without compromising the splices .
- **Internal Organization:** Equipped with splice trays for ribbon or individual fibers, clear fiber routing paths, heat-shrink splice protector slots, and cable strain relief anchors for secure and organized splicing .

Applications

- **Telecommunications and FTTH Networks:** Protects splices in outside plant networks.
- **Data Centers and Network Infrastructure:** Ensures orderly connectivity and easy maintenance.
- **Environmental Resistance:** Waterproof, dustproof, UV-resistant, and capable of withstanding temperature variations and chemical exposure .

Installation and Maintenance

- Closures allow easy access for maintenance or future expansion without disrupting the entire network. Removable trays or panels facilitate fiber management.
- Sealing methods include mechanical screw pressure or heat-shrink seals, depending on the closure type .
- Compatible with single-mode and multimode fibers, supporting a wide range of fiber diameters and connector types .

This package ensures long-term protection, reliability, and organized fiber management for both indoor and outdoor fiber optic networks, making it a critical component in modern telecommunications infrastructure.

Best Waterproof Fiber Optic Splice Closures for Outdoor and Indoor Use

Answering buyers seeking reliable waterproof fiber optic splice closures, this guide highlights five practical options

Amazon : Fiber Splice Enclosure

FTTH Fiber Optic Waterproof Box, Black 4Pcs | IP67 Rated, Outdoor or Indoor, SC Adapter Protection, for Drop Cable, Splice

2178 Fiber Closure

The expanded Fiber Optic Splice Closure 2178 family can help you meet these needs for most applications (including aerial, buried,

Optical Fiber Heat Shrink Tube | Fiber Optic Heat Shrink Splice

LongXing optical fiber heat shrink tubes consist of a rod of reinforcing the splice, hot fusion tubing and cross-linked polyolefin. To

Amazon : PNGKNYOCN Fiber Optic Junction Box, 2 in 2 Out Splice

Amazon : PNGKNYOCN Fiber Optic Junction Box, 2 in 2 Out Splice Box, Mini Small Square Type 12 Core Outdoor Waterproof

100pcs Clear Fiber Fusion Splice Sleeve Kit, 2.6mm 60mm

The fiber optic heat shrink tubes is tight and the metal support maintains its strength to prevent the fiber from breaking at the splice.

Fiber Optic Splice Enclosure

Horizontal type fiber cable joint box is more popular than vertical type (dome type) closure. The capacity of splice is from 24 fiber to

FTTH Outdoor Waterproof Optical Fiber Drop Cable Protection Box

Drop Cable Protect box is used for drop cable connecting, splice and protection. It can hold 1piece SC Simplex adapter, 2pcs SC fast

Fiber Optic Splice Protection Sleeves | Reliable Splice Guards

Discover premium fiber optic splice protection sleeves. Engineered for durability, our heat shrink sleeves ensure long-term protection

Amazon : Fiber Splice Kit
