

Fiber optic router indicator light price

Overview

Amazon.com: Fiber Test Light Visual Fault Locator, Fiber Optic Cable Tester Pen, VFL Red Light Tool with FC to LC Adapter & 2.5mm Universal Connector (Black).

Key Takeaways

Fiber optic router indicator lights typically cost between \$5 and \$30 per unit, depending on type and specifications. Price Overview

The cost of LED indicator lights for fiber routers varies based on factors such as size, color, voltage, and whether they are replacement parts or part of a kit. Basic single-color LEDs for router indicators usually range from \$5 to \$15, while more advanced multi-color or programmable LEDs can cost \$20 to \$30 per unit. Bulk packs or specialized replacement modules may be slightly higher.

Types of Router Indicator Lights

Fiber routers commonly have several LED indicators, each serving a specific function :

- **POWER:** Solid light indicates the router is powered.
- **PON (Passive Optical Network):** Solid light shows normal optical signal; blinking indicates abnormal signal levels.
- **LOS (Loss of Signal):** OFF is normal; red or blinking indicates a fiber disconnection or signal issue.
- **LAN:** Flickers when a device is connected and active.

- WLAN/Wi-Fi: Flickers to show wireless activity.

Where to Buy

- Online marketplaces like Amazon offer fiber optic lights and LED kits, though prices vary by product size and type .
- Electronics suppliers or router manufacturers may sell replacement LED modules compatible with specific router models.
- Local electronics stores may carry standard LEDs suitable for DIY replacement.

Tips for Purchase

- Verify compatibility with your router model before buying.
- Check voltage and size specifications to ensure proper installation.
- Consider buying multi-packs if multiple indicators need replacement. By understanding the type of LED and its function, you can select a suitable replacement within the typical \$5-\$30 price range.
