

Fireproof sealing of Class III fire-resistant cable trays

Overview

Material Selection: Fireproof coatings must comply with national safety standards. They should provide excellent fire resistance and durability. Process: Apply the coating evenly using spraying, rolling, or brushing. Control the thickness to achieve the required fireproof. The Product is a water-based ablative coating developed for the fire protection of grouped or bundled electrical cables, cable trays and for cable penetration seals IEC 60332 (Cat. A) and IEC 60331 test The Product must be stored in the original, unopened and undamaged sealed packaging in dry. Avoid cable fires and stop them safely! KBS ® offers various solutions to effectively protect cable penetrations from the passage of flames and smoke. In most cases, the task is to seal off complex cable systems and cables on support constructions. 7 products are successfully used to protect cables in high-rise buildings, industrial buildings, and offshore facilities as well as in sensitive areas, such as hospitals, airports, production. 3M Fire Barrier Moldable Putty+ is a one-part, halogen-free product designed to firestop electrical outlet boxes and a wide variety of through-penetrations including cable, conduit, insulated pipe and metal pipe, which penetrate fire-rated construction. FIRSTO fire stops are developed as a modular system which is simple to assemble around the cable run against the wall or on the floor.
