

Good electrical distribution box manufacturers in Libya

Overview

List of Libyan Power Distribution Box ManufacturersWe use cut-edge tools and modern machinery to manufacture premium quality Electrical Panels, LT Distribu.

Key Takeaways

Several Libyan companies, including Almanara Almutakadima, Al Hussain, EICO, Altazamon, and AHK Company, are recognized for manufacturing and supplying reliable electrical distribution boxes.Key Companies

1. Almanara Almutakadima (AAM CO, LTD) Established in 1998, Almanara Almutakadima imports and supplies industrial and household electrical materials, including low-voltage distribution boxes. They are the official agent for Chint Electric in Libya and provide products that meet international standards, along with after-sales services and customized solutions for the Libyan market . 2. Al Hussain for Electrical Industry and Services (HEISCO) Founded in 1993, HEISCO manufactures and assembles electrical distribution boards, low-voltage panels, package substations (11/0.4 KV), and silent generators. They are the official Schneider Electric panel builder in Libya, using high-quality ALUZINC steel sheets for metal boxes, ensuring durability and compliance with IEC and GECOL standards . 3. Electrical Industries Company (EICO) EICO operates factories producing low and medium voltage distribution panels, electrical distribution boxes, transformer protection boxes, and street lighting boxes. Their products are widely used by the General Electricity Company of Libya (GECOL) and are trusted for both public and private sector projects . 4. Altazamon Company Since 1998, Altazamon has specialized in engineering, assembly, and supply of electrical panels. They collaborate closely with GECOL to provide high-quality distribution equipment and offer tailored solutions for industrial and governmental clients, ensuring compliance with local and international standards . 5. AHK Company (Al-Shafaq) AHK Company manufactures and assembles low and medium voltage distribution panels, substation units, and ring distribution units. They partner with Chint Electric and provide customized solutions for factories, residential buildings, and infrastructure projects. Their products are certified and registered with GECOL, emphasizing reliability and adherence to international specifications .

Summary

For reliable electrical distribution boxes in Libya, these companies are notable for:

- Compliance with international standards (IEC, GECOL, Schneider Electric specifications)
- Use of high-quality materials such as ALUZINC steel
- Offering customized solutions and after-sales support
- Partnerships with global brands like Chint Electric and Schneider Electric Choosing any of these companies ensures access to durable, certified, and professionally supported electrical distribution equipment suitable for industrial, commercial, and residential applications.
