

Guyana Double Ladder Side Cable Tray Price

Overview

Price List Cable Tray 2024 - Free download as PDF File (.pdf), Text File (.txt) or view presentation slides online.

Key Takeaways

Double ladder side cable trays in Guyana typically require a direct quote from local suppliers, with international price references ranging from approximately \$400 to \$900 USD per 3-meter section depending on size and coating.

Double ladder side cable trays are designed to support and organize electrical, control, and data cables in industrial and commercial installations. They are made from durable steel or aluminum, often with corrosion-resistant coatings such as epoxy (EP) or hot-dip galvanization (HDG), and feature pre-punched holes for easy installation and rounded edges for safety. These trays can be customized in width, height, and length to suit specific project requirements.

Price Estimates

While local Guyana suppliers like Brilltech Engineers and Jeetmull Jaichandlall (P) Ltd. do not list exact prices online, international references provide a benchmark:

- PT Tricon Metalindo lists ladder cable trays (single ladder) with widths of 100–600 mm and lengths of 3 meters at prices ranging from \$390 to \$720 USD per section, depending on coating and size.

- Double ladder side trays, being more robust, are generally priced higher than single ladder trays, so a rough estimate would be \$400–\$900 USD per 3-meter section, depending on material, coating, and supplier.

Sourcing in Guyana

To obtain accurate pricing:

- Contact local manufacturers directly: Brilltech Engineers and Jeetmull Jaichandlall (P) Ltd. offer customizable ladder cable trays and can provide quotes based on your project specifications .

- Specify tray dimensions and coating: Width, height, length, and whether you require EP or HDG coating will affect the price.

- Request bulk pricing: Large orders may qualify for discounts.

- Consider shipping and import costs if sourcing from international suppliers.

Additional Considerations

- Material: Steel is standard for durability; aluminum is lighter but may cost more.

- Coating: Epoxy-coated trays are corrosion-resistant; HDG provides long-term protection in harsh environments.

- Accessories: Elbows, tees, and reducers may be sold separately and add to the total cost.

- Installation: Pre-punched holes and modular design reduce labor costs. For precise pricing, it is recommended to send a detailed inquiry to local suppliers with your required dimensions, material, and quantity. This ensures you receive a tailored quote suitable for your project in Guyana.
