

How much does a cable tray cost in Europe

Overview

Cable trays Cable trays Discover a comprehensive range of high-quality cable trays and cable ladders at ekabel24.com – the reliable choice for safe, 150mm.

Key Takeaways

European-style cable trays typically cost between €20 and €150 per meter, depending on material, coating, and load capacity.

The price of a European-style cable tray depends on several key factors:

- **Material:** Pre-galvanized steel is the most affordable, suitable for dry indoor areas, while hot-dip galvanized steel is more expensive and ideal for outdoor or industrial environments. Aluminum trays are lightweight but costlier, and stainless steel is the most expensive, used in highly corrosive or hygienic settings .
- **Type and Design:** Ladder-type trays for heavy power cables are generally more expensive than wire mesh or perforated trays, which are lighter and easier to install .
- **Size and Load Capacity:** Wider or deeper trays designed to carry heavier cables increase the cost. Custom sizes or reinforced EU Series trays may also add to the price .

- Coating and Finish: Hot-dip galvanization, powder coating, or stainless steel finishes affect durability and cost, especially for outdoor or corrosive environments .

Price Estimates

- Wire Mesh Trays: €20–€40 per meter, suitable for data or small cables in offices or data centers .
- Pre-Galvanized Steel Ladder Trays: €30–€60 per meter, ideal for indoor power cable installations .
- Hot-Dip Galvanized Steel Trays: €50–€100 per meter, suitable for outdoor or industrial use .
- Aluminum Trays: €60–€120 per meter, lightweight and corrosion-resistant .
- Stainless Steel Trays: €100–€150+ per meter, used in food processing, marine, or highly corrosive environments .

Additional Considerations

- Installation Costs: Labor can significantly affect the total project cost. Cable trays are generally faster to install than conduit systems, reducing labor expenses .
- Project Scale: Large projects may benefit from bulk pricing or supplier discounts, especially for orders over €500–€1000 .
- Customization: EU Series or heavy-duty trays with special coatings or custom lengths may require a quote from suppliers . In summary, while a single meter of a European-style cable tray can range from €20 to over €150 depending on material and specifications, the total cost should also account for installation, supports, and project-specific requirements to get an accurate budget estimate.
