

Huawei Gigabit Optical-to-Electronic Port Module Self-operated

Overview

Huawei EA5801E-GP08-GP16-GP04-Optical Access Huawei OptiXaccess EA5801E is a box-shaped Optical Line Terminal (OLT) with Gigabit Passive Optical 10GE SFP+.

Key Takeaways

Huawei Gigabit O/E port modules provide reliable 1Gbps connectivity via optical or RJ45 interfaces, supporting various transmission distances and network standards. Overview

Huawei offers a range of Gigabit Ethernet (GE) optical and electrical SFP modules designed for self-operated networks, enabling flexible deployment in switches, routers, and access devices. These modules convert optical signals to electrical signals (and vice versa), supporting high-speed data transmission over fiber or copper cabling.

Key Types and Specifications

- Electrical (Copper) Modules
- Model: SFP-GE-T / OEGD01N01
- Interface: RJ45, 1000BASE-T
- Transmission Distance: Up to 100 meters over Cat5e/Cat6 cables
- Features: Auto-negotiation, high compatibility with Huawei switches (S5700, S6700, S9303)

- Use Case: Short-range connections in corporate networks, data centers, or campus environments
- Optical Modules
 - Single-mode (SM) Modules: e.g., SFP-GE-LX-SM1310, S-SFP-GE-LH40-SM1310
 - Wavelength: 1310nm
 - Distance: 10-40 km
 - Connector: LC
 - Application: Long-distance fiber links
- Multi-mode (MM) Modules: e.g., eSFP-GE-SX-MM850
- Wavelength: 850nm
- Distance: 0.55 km
- Connector: LC
- Application: Short-distance fiber connections within buildings or data centers
- Bidirectional (BIDI) Modules: e.g., SFP-GE-LX-SM1310-BIDI / SFP-GE-LX-SM1490-BIDI
- Feature: Single-fiber bidirectional transmission, must be used in pairs
- Distance: 10 km
- Application: Reduces fiber usage in point-to-point links

Compatibility and Deployment

Huawei Gigabit O/E modules are tested for compatibility with Huawei switches and optical boards, ensuring reliable link establishment, PING connectivity, and proper operation without anomalies . They are suitable for:

- Enterprise networks requiring flexible uplinks
- Data centers needing high-density, scalable connections
- Campus networks with mixed fiber and copper infrastructure

Additional Features

- Digital Diagnostic Monitoring (DDM): Some optical modules support real-time monitoring of temperature, voltage, and optical power.
- Energy Efficiency: Certain boards and modules support automatic power-off in high-temperature conditions to conserve energy .
- Standards Compliance: Modules comply with 1000BASE-T, 1000BASE-SX, 1000BASE-LX, and other IEEE standards for Gigabit Ethernet.

Summary

Huawei self-operated Gigabit O/E port modules provide versatile, reliable, and standards-compliant solutions for both copper and fiber networks. Electrical modules like SFP-GE-T or OEGD01N01 are ideal for short-range RJ45 connections, while optical modules, including single-mode, multi-mode, and BIDI types, support distances from hundreds of meters to 100 km. Proper selection ensures optimal network performance, compatibility, and efficient fiber utilization .
