

Huawei OLT-C Optical Module

Overview

The MA5801 series OLT is a compact and low-density box-shaped OLT. It provides multiple fiber to the home (FTTH) solutions to meet the requirements of economical and efficient network construction.

Key Takeaways

OSG002004 is a Huawei Compatible GPON OLT Class C+ transceiver, operating over Single-Mode Fiber (SMF) optical cable. It has minimum guaranteed optical budget of 33 dB, which in most cases is enough to reach the 20km distance. Return Material Authorization (RMA) Process Standard Hardware Warranty Policy: Original new sealed ZTE product: 1 Year The Support. The MA5801 series OLT is a compact and low-density box-shaped OLT. It provides multiple fiber to the home (FTTH) solutions to meet the requirements of economical and efficient network construction. However, distance is just an indicative parameter calculated for comfort. Optical Power & Transmission Performance (OPTICAL POWER & TRANSMISSION) The Class C+ standard supports 32dB optical link loss, while Huawei's MA5800 series achieves an ultra-wide budget of 33dB with APD detector technology. Interface & Physical Features (Interface & Physical Features) IV. It can fully support the GPON OLT C+ application specified by the ITU-T G.
