

Imported Cable Tray Production Line Manufacturer

Overview

HOPEX is a professional manufacturer of cable tray forming machines, has over 20 years of experience.

Key Takeaways

Leading manufacturers of imported cable tray production lines include Jinggong, Tianhong, Superdamc, Haixing Tianjin, and Coilmak, offering automated, high-precision roll forming solutions.

1. Jinggong Machine (China) Jinggong offers the HCM-600 Automatic Cable Tray Roll Forming Machine, which uses metal sheet coils as raw material. The line includes decoiling, leveling, punching, notching, roll forming, straightening, and cutting, all controlled via PLC and AC frequency conversion for continuous automatic production. It supports coil widths up to 1000mm and capacities up to 5 tons, with hydraulic decoilers and adjustable rollers for various tray specifications . 2. Tianhong Cable Tray (China) Shandong Tianhong Electric Power Technology Co., Ltd. specializes in perforated trays, cable ladders, trunking, and fittings. Their automated production lines ensure stable quality, fast delivery, and OEM/ODM customization. Tianhong emphasizes corrosion-resistant powder-coated surfaces, heavy-duty solutions for industrial environments, and versatile systems for commercial and data center installations . 3. Superdamc (China) Superdamc provides a complete cable tray roll forming line with decoiler, leveling machine, servo feeding, punching, roll forming, and cutting. The line handles GI and low-carbon steel sheets (0.8–2.0mm), with adjustable line speeds of 4–6 m/min. Imported components like servo motors and digital control systems enhance feeding accuracy and production efficiency . 4. Haixing Tianjin (China) Haixing's production line supports perforated, ladder, and solid-bottom trays with high precision and speeds of 10–15 m/min. CE and ISO certifications ensure compliance with global standards. The line is designed to reduce labor costs, boost productivity, and maintain consistent quality, suitable for industrial electrical projects, power plants, and construction industries worldwide . 5. Coilmak (Turkey) Coilmak, based in Istanbul, manufactures coil handling and press feeding systems for cable tray production. Their equipment is designed for efficient coil processing and integration with roll forming lines, catering to international clients seeking European-manufactured machinery .

Considerations for Selection

- Automation Level: Look for PLC control, servo feeding, and automatic decoiling for efficiency.
- Material Compatibility: Ensure the line supports the steel type and thickness you plan to use.
- Production Speed: Speeds vary from 4–15 m/min depending on tray type and complexity.
- Customization: OEM/ODM services allow adaptation to specific project requirements.
- Certifications: CE and ISO certifications indicate compliance with international quality standards. These manufacturers provide import-ready cable tray production lines suitable for industrial, commercial, and infrastructure projects, combining high automation, precision, and global support.
