

JP Distribution Box Standard

Overview

JP series outdoor integrated distribution box is an outdoor integrated distribution device that combines multiple functions such as metering, outgoing line, and reactive power compensation. It has local short-circuit, overload, overvoltage, leakage and other protection functions. It is designed specifically for the renovation of rural and urban power grids. It is small in size. • Rod transformer distribution cabinet under three-phase AC 660V (50/60Hz) • Transformer capacity: 10, 20, 30, 50, 63, 80, 100, 125, 160, 200, 250, 315, 400, 500, 630 (KVA) • High reliability of operational validation in more than 50 countries and regions worldwide • It is mainly used for outdoor. JP integrated distribution box, is a concentration of measuring, qualification, reactive power compensation and other multi-functional comprehensive reach outdoor distribution equipment at an organic whole, with a short circuit, overload, over voltage, electric leakage protection function, small.
