

Large optical cable fittings

Overview

These fittings include connectors, which provide the interface between optical fibers; adapters (also known as duplex sleeves), which align and join connectors precisely; splices, used to permanently or semi-permanently join two fiber cables; and terminators, which safely. These fittings include connectors, which provide the interface between optical fibers; adapters (also known as duplex sleeves), which align and join connectors precisely; splices, used to permanently or semi-permanently join two fiber cables; and terminators, which safely. As a leading supplier of advanced fiber optic components, Molex has an extensive product offering that includes a full range of optical solutions from connectors, adapters and cables to backplanes and high-density interconnects. Molex's experience and resources provide customers a wide range of. through the optical fibers. We started developing fittings for optical fiber aerial cables as soon as these cables appeared on the market ptical fiber. Radiall's full range of optical interconnect solutions includes standard interfaces, optical termini, optical connectors and custom optical assemblies and subsystems. Suitable for harsh environments and designed for demanding applications where reliability and high performance are required, our. TE's fiber optic connectors accommodate 10G Ethernet — with the capacity to handle next-generation 40G and 100G when needed — without the severe distance limitations of copper cable. Easy to maintain in the field, and reliable when operating in harsh environments, our fiber optic cable connectors. Explore our extensive portfolio of optical cable assemblies, designed to meet a variety of needs with solutions ranging from single-fiber to multi-fiber configurations. Hot dip, dacromet or chroming galvanization, prevent from oxidation and corrosion. Insulation piercing connector property:.
