

Malaysia Fiber Optic Cable Junction Box 24 Cores

Overview

24 Port Fiber Optic FTTH Termination Box (FTB) / Distribution Box. Protection against low-pressure jets (6.3 mm) of directed water from any angle (limite).

Key Takeaways

A 24-core fiber optic junction box in Malaysia is designed for splicing, protection, and distribution of fiber cables, suitable for both indoor and outdoor installations.

Overview
A 24-core fiber optic junction box is used to house, protect, and manage fiber optic splices. It allows multiple fiber cables to be connected, spliced, and organized efficiently, making it essential for FTTH (Fiber to the Home) and other fiber optic network deployments in Malaysia .

Key Features

- Capacity: Supports up to 24 fiber cores, often with two trays for 12 fibers each, and additional storage baskets for excess fibers .
- Material: Commonly made from PP (polypropylene) or ABS plastic, offering anti-UV, anti-aging, and corrosion resistance for long service life .
- Protection: Fully mechanical sealing, waterproof, and reusable without additional adhesive tape, suitable for harsh outdoor conditions .

- **Mounting Options:** Can be wall-mounted, aerial, or rail-mounted, depending on the model .
- **Interfaces:** Compatible with various connectors such as FC, LC, SC, and ST, allowing flexible integration with existing fiber networks .
- **Temperature Range:** Typically operates between -5°C to +40°C, with storage temperatures from -40°C to +70°C .
- **IP Rating:** Many models offer IP65 protection, ensuring resistance to dust and water ingress .

Applications

- **FTTH Installations:** Commonly used for TM UNIFI and other broadband service providers in Malaysia .
- **Indoor and Outdoor Networks:** Suitable for both indoor wall-mount setups and outdoor aerial or pole-mounted installations .
- **Fiber Splicing and Termination:** Provides organized space for splicing trays, pigtails, and adapters, ensuring efficient fiber management .

Advantages

- **Durable and Reusable:** Resistant to environmental stress and can be reopened for maintenance .
- **Efficient Fiber Management:** Storage baskets and trays allow neat organization of fibers and prevent damage.
- **Versatile Installation:** Supports multiple mounting methods and connector types, making it adaptable to various network setups . For purchasing, Malaysian suppliers such as BWN Fiber, CoreTECH, and 3C-Tech offer 24-core fiber optic junction boxes with detailed specifications and accessories for FTTH and other fiber optic applications .
