

Network cabinet cable management unit

Overview

A cable management rack is designed to route, protect, and organize copper and fiber cables inside network cabinets. Beyond keeping cables tidy, a well-structured cable manager reduces cable stress, improves heat dissipation, and ensures bend-radius compliance for data. Our vast selection of cabinets, thermal management, racks, enclosures for data centers, telecommunications equipment rooms, and enterprise cabling applications help optimize space, reduce energy consumption, and enhance network reliability. FlexFusion™ Cabinets XG offer a unique universal platform. It is an all-in-one cable management solution consisting of 24 retractable Cat. Our innovative system enables 10x faster installation & maintenance and thanks to our Patchcatch it also allows up to 50% more space. Belden offers a complete line of Racks, Cabinets and Accessories that help maximize Data Center uptime and ROI. Lead Time – View accurate lead times to plan your delivery expectations.
