

Network cabling cabinet height

Overview

Network cabinets are measured in rack units, abbreviated as "U". Cabinets typically range from 6U (for wall-mounted setups) to 48U (for large server rooms). Start by listing all the equipment you plan to install and adding up their total. The interior height, which is important for usability, is measured in U (height unit) in an internationally standardized way. The OUTSIDE height of the cabinet is then defined by the roof and floor construction of the respective cabinet type. Some standard dimensions have become. Section 1: What Does 'U' Mean in Network Cabinets?

Let's start with the basics. But for network cabinets, we use "U". Confused by 'U' (Rack Units) when looking at data cabinets?

Use the following table to work out the height of a cabinet in inches, centimetres or feet based on the U height. Common sizes: 42U, 48U, and compact options like 22U-27U.
