

New Zealand Telecommunication Tower Anchor Bolts

Overview

This Standard specifies requirements for single-nut and double-nut type steel tower bolts, including step bolts, with ISO metric coarse pitch series threads, in diameters from 12 mm to 30 mm, and lengths from 35 mm to 160 mm, suitable for use in electricity transmission. This Standard specifies requirements for single-nut and double-nut type steel tower bolts, including step bolts, with ISO metric coarse pitch series threads, in diameters from 12 mm to 30 mm, and lengths from 35 mm to 160 mm, suitable for use in electricity transmission. Light duty anchors such as WallMate™ mini anchors are designed for low-load residential, commercial and industrial applications where you're fastening everyday items that involve quick installation with low force on the anchor. Typical uses include hanging small fixtures and fittings, and fixing. This paper has been prepared by SESOC for the guidance and assistance of its members. It deals with anchor bolts (historically called 'hold down bolts') that are cast into reinforced concrete foundations in order to 'anchor' steel structures to those foundations. Designed in Germany and made in the E. to the highest standards, Fischer ensures you. Request For Our Latest Prices On Anchor Bolts in Hamilton, New Zealand!
