

Outdoor Hanging Optical Cable Identification Sign

Overview

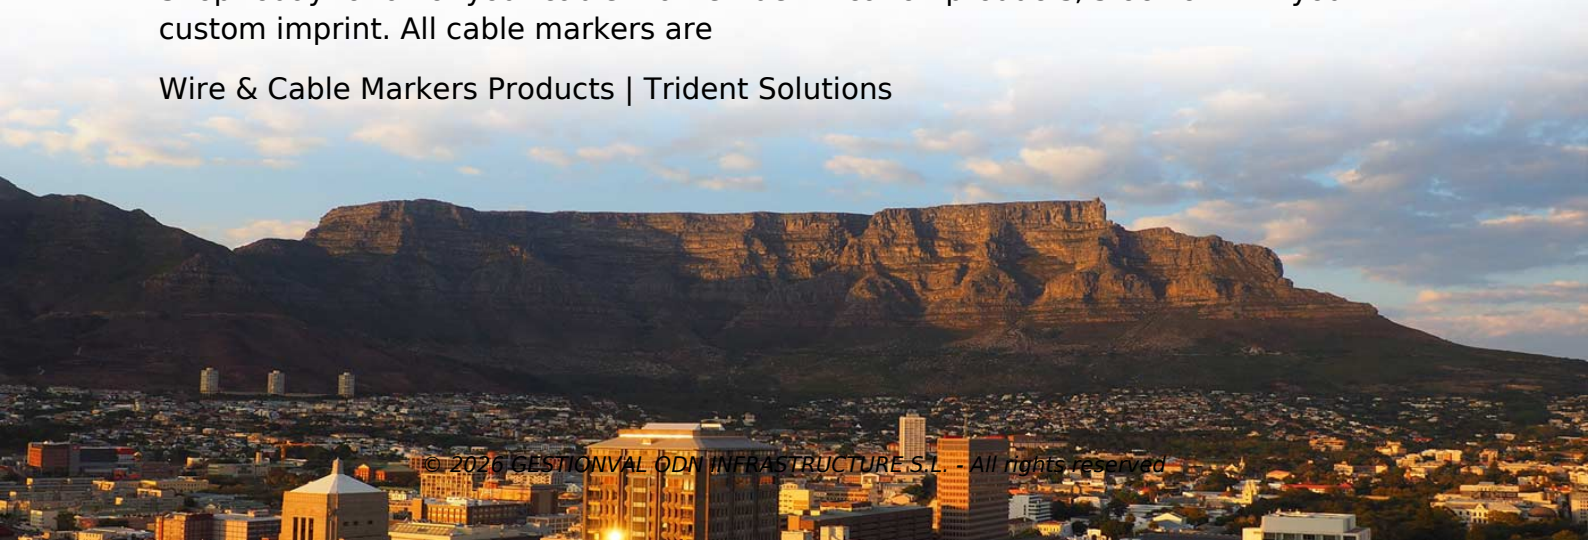

These tags provide clear labeling for fiber optic lines, URD cables, aerial installations, and other wiring systems. The marker is thermoformed to create a permanent coil that will always return to a coiled position. Note: We recommend the standard flap sizes (see chart below) for outdoor environments. The wire and cable marking portfolio includes cable labels, self adhesive labels, cable markers, printable shrinkable sleeves and tubes, self-laminating cable labels, label dispensers, pre-printed cable. Fiber optic cable tags are essential tools for identifying and organizing fiber optic cables in outdoor and indoor environments. All cable markers are BEAD and BABA compliant. Options include self-laminating tags, snap-around markers.
