

Parameters of a 16-Port Fiber Optic Switch

Overview

Supports 16 of SPF Gigabit ports, 8 Combo Gigabit ports and 4 SFP+ 10Gigabit ports. Each port can support wire-speed forwarding. The BP-SWM8G8F01 has L2+ full network management function, supports IPV4/IPV6 management, static route full. A 16-port fiber optic switch is a critical networking device used in enterprise environments, data centers, and high-performance computing systems to enable fast, reliable, and scalable communication between networked devices. It supports up to 28 connection. OPT-6016 L2 Fiber Ethernet Switch provide 16-port 1000M SFP fiber ports, the SFP type is flexible according to user needing, such as 1000Base-T, 1000Base-SX, 1000Base-LX and so on. OPT-6016 L2+ provide easier manageability, stable performance and excellent quality, with a higher cost performance. The MEMS FIBER Optical switches establish optical signal paths passively in milliseconds supporting all data rates, ideally suited to manage and monitor large optical networks intelligently and remotely.
