

Price of Low Voltage Cable Trays

Overview

Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Same and Next Day Delivery.

Key Takeaways

Low voltage cable tray prices vary based on material, type, size, and load capacity, typically ranging from economical steel options to premium stainless steel systems. Overview of Cable Tray Types and Materials

Low voltage cable trays are designed to support and organize cables operating below 1000V AC or 1500V DC, and they come in several types:

- Solid Bottom Trays (Type A/B/C): Provide maximum protection for cables, suitable for indoor or industrial environments, with Type C supporting heavier loads .
- Slotted and Perforated Trays: Allow partial ventilation, reducing heat buildup while maintaining cable support .
- Wire Mesh/Basket Trays: Flexible, lightweight, and ideal for data and communication cables, offering excellent airflow and easy maintenance .
- Floor-Mounted Enclosed Trays: Heavy-duty protection, often embedded in concrete or mounted on the floor . Materials commonly used include galvanized steel, aluminum, and stainless steel, with steel being the most economical, aluminum offering corrosion resistance and reduced weight, and stainless steel providing superior durability in harsh environments .

Pricing Considerations

Cable tray pricing depends on multiple factors:

- **Material:** Steel is cost-effective for standard indoor use, aluminum is mid-range, and stainless steel is premium .
- **Dimensions and Load Capacity:** Wider, deeper, or longer trays designed for heavier cable loads cost more .
- **Environmental Protection:** Coatings, corrosion resistance, and fire safety ratings influence price .
- **Installation Efficiency:** Modular, tool-free designs reduce labor costs, impacting overall project expenses .
- **Accessories:** Covers, connectors, and cable management peripherals add to the total cost .

Typical Price Ranges

While prices vary by supplier and region, approximate ranges are:

- **Steel Wire Mesh Trays:** \$10-\$25 per foot, depending on size and gauge .
- **Perforated Steel Trays:** \$15-\$35 per foot, with corrosion-resistant finishes costing more .
- **Aluminum Trays:** \$20-\$50 per foot, offering lightweight and corrosion-resistant options .
- **Stainless Steel Trays:** \$40-\$80 per foot, suitable for harsh or outdoor environments .

Cost-Effectiveness Tips

- **Choose material based on environment:** indoor projects can use steel, while outdoor or corrosive environments benefit from aluminum or stainless steel.
- **Consider modular or pre-fabricated trays** to reduce installation labor.
- **Factor in future expansion:** wire mesh or perforated trays allow easier cable additions without full replacement.
- **Evaluate long-term durability:** premium materials may have higher upfront costs but lower maintenance and replacement expenses . For suppliers, platforms like Alibaba and RS Hong Kong offer a wide range of low voltage cable trays with detailed specifications and pricing options, allowing for comparison and bulk purchase .

Best Low Voltage Cable Tray Solutions for Clean Cables

Answering the need for organized, safer, and accessible cabling, this guide highlights five reliable low voltage cable

Cable Tray and Reels | Wire and Cable Management

From heavy power cable pathways on oil drilling platforms to data center cabling, explore the cable tray that's strong yet easy to

Wire Mesh Cable Trays

When it comes to Wire Mesh Cable Trays, you can count on Grainger. Supplies and solutions for every industry, plus easy ordering,

Cable Tray and Reels | Wire and Cable Management

Fast installation with dependable support. Everything you need to build a cable management system, including Cablofil wire mesh

Ladder Type Cable Tray

Ladder Type Cable Tray Ladder type cable tray systems consists of two longitudinal side members connected by individual

Cable Trays and Cable Ladder Systems

Cable tray systems and cable ladder systems are designed for use as supports for cables and not as enclosures giving full

Types of Cable Trays - Advantages, Applications and Sizes

8. Solid Bottom Cable Tray Solid bottom cable trays are fully enclosed and provide maximum protection for sensitive

Cable Tray and Ladder Systems

Basor Electric, the premier choice for cable management solutions, delivers unparalleled quality and innovation in cable tray and

Tray Cable | Tray Cable Inventory for Industrial Use

Browse OmniCable's extensive tray cable inventory, including 600V tray cables for power and control in wet, dry, and hazardous

Cable Ladder Trays

When it comes to Cable Ladder Trays, you can count on Grainger. Supplies and solutions for every industry, plus easy ordering, fast

Cable Tray Types and Sizes

These cable tray systems serve as efficient alternatives to traditional wireways and electrical conduits, which fully enclose cables.

Cable Tray

Our Wire Mesh Tray creates a dedicated pathway for all low-voltage and data cables. It is constructed of precision

Basket Cable Tray, 4" H x 18" W x 10" Long, Steel

Eaton's B-Line series Flextray basket tray features a full portfolio of straight sections, fittings and accessories to support your

Kable Kontrol Cable Tray

These wire mesh cable trays suspend cables and ensure that your important wires and cables are safely organized and out of your

Cable Tray

Explore precision-engineered Wire Mesh Tray built from high-quality welded steel, offering a safe, reliable pathway for low-voltage

Cable Tray & Accessories

WBT Performance Cable Tray, Shaped 4"X8"X118", Pregalvanized. Provides optimal support for high-performance data cable, up to

Cable Tray Systems

Choose from basket style, snake trays, and solid or ladder cable trays. Discover high-quality Cable Tray Systems at CableOrganizer.
