

Price of Network Cable Tray Splicing

Overview

Cable Tray Cable Runway Junction Splice Kit connects two straight ladder rack sections at a 90-degree angle. This Junction Splice Kit (cULus), Kable Kontro.

Key Takeaways

Network cable tray splicing kits typically range from \$50 to \$200 per set, depending on type, material, and package quantity. Overview of Cable Tray Splicing Options

Cable tray splicing is used to connect straight sections or fittings of ladder racks or wire mesh trays. Common types include:

- **Junction Splice Kits:** Connect two straight ladder rack sections at a 90-degree angle. Available in zinc-plated or black steel finishes, often sold in packages of 50 sets.
- **Butt-Splice Kits:** Join straight sections together in-line. These kits are cULus classified and come in carbon steel or electroplated zinc.
- **Adjustable Splice Kits:** Allow for vertical or angled adjustments when connecting trays.

Price Range

- Amazon offers splice couplers and connection hardware for wire mesh trays, with prices generally starting around \$50-\$100 per kit for standard packages of 50 pieces, depending on material (zinc-plated or stainless steel) and brand (Kable Kontrol) .

- Platt Electric Supply lists various splice kits, including junction and butt-splice kits, with typical prices ranging from \$75 to \$200 per set, depending on size, material, and whether the kit includes assembly tools .

Material Considerations

- Zinc-Plated Steel: Economical, corrosion-resistant, suitable for indoor or light industrial use.
- Stainless Steel: Higher durability, ideal for outdoor or harsh environments.
- Carbon Steel with Electroplated Zinc: Provides strength and moderate corrosion resistance, often used in heavy-duty installations.

Package Quantities

Most splicing kits are sold in bulk packages of 50 sets, which is standard for professional installations in data centers, network closets, or industrial facilities . Smaller quantities may be available from specialty suppliers or online retailers.

Summary

For budgeting purposes, expect to pay \$50–\$200 per splicing kit, with the final cost influenced by material, type of splice, and package size. For large-scale installations, purchasing in bulk from suppliers like Platt Electric Supply or Amazon can provide cost efficiency and ensure compatibility with your cable tray system .
