

Recommended Spectrometer for Algerian Foundry

Overview

The SPECTROLAB as well as the SPECTROMAXx can be employed depending on the specialization, the number of casting processes and the semi-finished and finished products being produced. The SPECTROCHECK is generally used by small companies. The arc/spark portable metal analyzer for easy and fast metal analysis on-site. Standards-Compliant Elemental Analysis: Does Your Testing Meet Today's Requirements?

Which ICP-OES optical technology offers superior performance: Echelle or ORCA?

Production processes in steel and non-ferrous foundries. If you are looking for high performance at low price and compact size, the FOUNDRY-MASTER Smart 2 is the ideal solution. For fast, comprehensive quality control in a single instrument. By minimising correction time and maximising throughput, a spectrometer for Steel testing ensures production accuracy while saving. Used Foundry Spectrometers For Metal Analysis | We Buy & Sell

We are a dealer specializing in second hand optical emission spectrometers (OES) used for base metal analysis of primary metal and secondary metal used in ferrous and non-ferrous foundry and die

FOUNDRIES

Reliable Alloy Verification for Foundries. The MERLIN 4 is a robust mid-range CMOS Optical Emission Spectrometer, ideal for the day-to-day analytical demands of foundries and metal casting facilities.

Spectrographic Analysis — Nortech Advanced NDT Ltd.

Optical Emission Spectrometers (OES) is the leading method for analysis of trace metals to determine chemical composition. Suitable for a range of industries and
