

Tonga Power Distribution Network Automation Pilot Project

Overview

The project will help the Government of Tonga reduce climate vulnerability and technical power losses in the electricity network by upgrading the aged and inefficient network to a higher standard of disaster resilience to overcome extreme weather conditions and disasters in. The project will help the Government of Tonga reduce climate vulnerability and technical power losses in the electricity network by upgrading the aged and inefficient network to a higher standard of disaster resilience to overcome extreme weather conditions and disasters in. The government had set as one of its National Determined Contributions (NDC's) for line losses to be reduced by 9% by end of year 2020, in which TPL has successfully achieved, due to the implementation and completion of the Network Upgrade Projects. Power Network Upgrade to all Islands. This Due Diligence Report sets out the findings of an assessment of the proposed Nuku'alofa Distribution Network Upgrade Project (NNUP). This includes a Technical Analysis, Procurement Assessment, Safeguards Assessment, and an Economic and Financial Analysis. The proposed project includes five. The implementing agency, Tonga Power Limited (TPL), generates and distributes electricity across four islands: Tongatapu, 'Eua, Ha'apai, and Vava'u. The Nuku'alofa Network Upgrade Project aims to improve climate resilience (particularly cyclone resilience), reduce network losses, and improve the. value during a fault.
