

Vanuatu Optical Line Terminal Construction

Overview

The project, which covers feasibility studies, design planning and cost assessments, carries an estimated budget of about 18 million vatu and marks the latest step in efforts to replace a terminal originally built in the 1990s. Vanuatu has been recognized for its outstanding leadership and initiatives in telecommunications/ICT development and was awarded by ITU with the prestigious “ICT in Sustainable Development Award” in 2015. PRIF Members include Asian Development Bank (ADB), Australian Department of Foreign Affairs and Trade (DFAT), European Union and European Investment Bank (EU/EIB), Japan International Cooperation Agency (JICA), New Zealand Ministry of Fo. Vanuatu's international airport has moved into the design phase of a long-planned terminal upgrade after Port Vila-based Fosi Consulting won the tender, authorities announced. We currently have active. Local tech company Prima Limited and the Asian Development Bank (ADB) have signed a debt-plus-grant mandate agreement to help fund the 'Tamtam' cable, which will be Vanuatu's second subsea fibre optic cable. The cable will connect Port Vila through Lifou, New Caledonia, supplying global bandwidth. Fiber Optic Infrastructure Deployment: We design and install underground and aerial fiber optic networks, connecting government buildings, commercial hubs, schools, hospitals, and communities to fast and secure data services. Satellite and VSAT Connectivity: For outer islands and remote locations.
