

XR Series Distribution Box

Overview

xr series distribution box | etrailerTo prevent mildew from forming on the cover while it's rolled up, the RetraxPRO XR features a water management system.

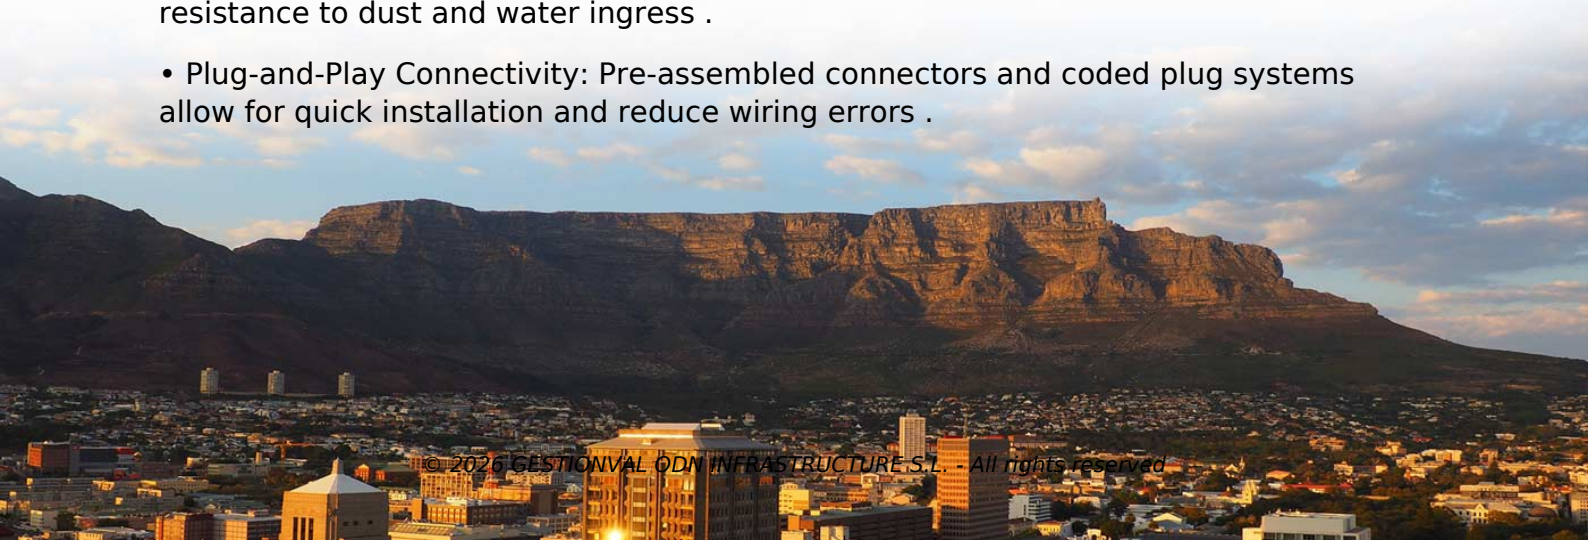

Key Takeaways

XR series distribution boxes are modular, high-quality enclosures designed for reliable power and signal distribution in various applications.Overview

XR series distribution boxes are engineered to provide efficient and safe distribution of power, signals, and data in industrial, commercial, and recreational setups . They are typically modular, allowing for flexible configurations to suit specific installation requirements, whether in control cabinets, decentralized setups, or room automation systems . These boxes are designed to simplify wiring, reduce installation time, and enhance system reliability.

Key Features

- **Modular Design:** Components can be customized for different applications, including sensor-actuator networks, M8/M12 connectors, and power bus systems .
- **Protection Ratings:** Many XR series boxes offer IP65 or IP67 protection, ensuring resistance to dust and water ingress .
- **Plug-and-Play Connectivity:** Pre-assembled connectors and coded plug systems allow for quick installation and reduce wiring errors .

- **Space and Cost Efficiency:** By consolidating multiple connections into a single enclosure, XR series boxes save space and reduce the need for multiple terminal blocks .

- **Versatile Applications:** Suitable for industrial automation, decentralized power distribution, sensor-actuator cabling, and room automation .

Installation and Use

XR series distribution boxes are designed for easy mounting in control cabinets, suspended ceilings, or raised floors. The modular components allow for quick replacement or expansion, and integrated LEDs or indicators can assist in troubleshooting . They support a wide range of cable sizes (typically 0.5 to 10 mm²) and can handle both power and signal distribution efficiently .

Advantages

- **Reliable Connections:** High-quality materials and robust design ensure consistent performance.

- **Reduced Commissioning Time:** Pre-assembled and tested components minimize on-site setup.

- **Customizable Solutions:** Tailored configurations are available for specialized applications, including hazardous or EX zones . XR series distribution boxes are ideal for users seeking flexible, reliable, and space-saving solutions for complex electrical and automation systems, combining modularity with high protection standards and ease of installation .
